

2012 NATIONAL CLIMATE CHANGE MARCH
SATURDAY 1 DECEMBER 12 NOON
ASSEMBLE GROSVENOR SQUARE - MARCH TO PARLIAMENT*

***IF ROMNEY WINS THE US ELECTION - WE'LL START AT PARLIAMENT & MARCH TO THE US EMBASSY**

GET FRACTIOUS

GREEN ENERGY NOT 'EXTREME' ENERGY

KEEP FRACKING OUT OF THE UK! NO TO TAR SANDS OIL!

→ This year has seen the passing of an awesome milestone in the accelerating escalation of the climate crisis - the record shattering disappearance of summertime Arctic sea ice. It is now predicted that there will be no Arctic sea ice, at the end of summer, by 2015.

Something that a short while ago was not predicted to happen until around the end of the century is happening before our very eyes RIGHT NOW!

Climate change is now altering the planet's basic geography and it's clearly happening much faster than

anyone predicted.

Not only that, but studies have linked what's happening in the Arctic to recent extreme

weather events that have destroyed crops and sent food prices spiraling, hitting the world's poorest hardest.

This is not going to get any better... it's likely to get worse at an accelerating rate.

Yet, even as the world is poised on the brink of a tragedy of unimaginable scale, none of our leaders seems to be so much as blinking an eyelid in response.

Worse than that humanity is engaged in a madcap suicidal dash to unearth yet more of what caused the problem in the first place - FOSSIL FUEL! (see over)

2012 NATIONAL CLIMATE CHANGE MARCH
SATURDAY 1 DECEMBER 12 NOON
ASSEMBLE GROSVENOR SQUARE - MARCH TO PARLIAMENT*

***IF ROMNEY WINS THE US ELECTION - WE'LL START AT PARLIAMENT & MARCH TO THE US EMBASSY**

HELP US BUILD A GIANT MOCK FRACKING RIG OUTSIDE PARLIAMENT

🔥 LET THEM KNOW FRACKING WILL BE RESISTED ALL THE WAY 🔥

→ Even as the signs from the natural world that climate change is accelerating out of control reach a crescendo, the human response is increasingly insane.

Not only are we burning ever more fossil fuel but new and often more carbon intensive types are being discovered and exploited.

Here in the UK they are trying to introduce the incredibly destructive and polluting practice

of 'fracking' (hydraulic fracturing) for shale gas – something that has already caused huge controversy in the US.

Here in the UK 'fracking' forms part of Osborne's 'dash for gas' away from Green energy.

Stop Osborne and stand with us in solidarity with all the communities around the UK threatened by 'fracking'.

→ In Canada the exploitation of tar sands threatens to send 200 gigatonnes of CO2 into the atmosphere, and will be piped down to the US in the Keystone Pipeline. **HELP US BUILD OUR OWN 'GROSVENOR SQUARE KEYSTONE PIPELINE' FROM THE CANADIAN HIGH COMMISSION TO THE US EMBASSY**
